TECH STACK

JavaScript | Node.js | Electron
HTML5 | CSS3 | Git
Lua | Java | Spring

DEVELOPMENT APPROACH

- Automation-first thinking
- Process improvement
- Analytical troubleshooting
- User-centred solutions
- Forward planning
- Reliability and efficiency
- Continuous learning

JOÃO MENDES

Junior Software Developer | Automation | Electron & JavaScript

Junior software developer with hands-on experience building JavaScript automation tools, Chrome extensions, and an Electron desktop workspace to simplify repetitive operational workflows. Working knowledge of Java, Spring Framework, Lua, HTML5, and CSS3, supported by formal programming training. Proactive problem-solver seeking a first professional software development opportunity.

SELECTED DEVELOPMENT PROJECTS

Operations Automation Workspace | Personal Project | Electron, JavaScript, Node.js, HTML5, CSS3 | *In development*

- Designing and building a modular desktop workspace that centralises recurring operational tools and automates repetitive workflows.
- Using Electron IPC, persistent application state, API integrations, automated tests, and packaging while iterating from real user needs.

Browser Workflow Extensions | Personal Projects | JavaScript, Chrome Extensions | *Ongoing*

- Developed extensions and injected-page utilities that streamline navigation, information capture, data entry, and recurring support steps through reusable, user-focused automation.

Lua Automation & Test Harnesses | Personal Projects | Lua | *Ongoing*

- Created state-driven automation scripts and scenario-based harnesses for workflow synchronisation, recovery logic, and repeatable validation.

PROFESSIONAL EXPERIENCE

GOPUFF | Remote, London Area, UK | Part-time

Live Operations & Customer Service Supervisor | *Jul 2026 - Present*

- Promoted from Customer Service Representative after combining frontline performance with proactive automation and process-improvement initiatives.
- Guide agents during live operations, resolve escalated cases, coordinate incidents, and develop practical tools that reduce repetitive steps for users.

Customer Service Representative | *Oct 2025 - Jun 2026*

- Managed multichannel enquiries and identified recurring pain points that could be translated into browser-based automation opportunities.

Customer Service Specialist | Booking.com | Lisbon | Hybrid | *Oct 2023 - Mar 2025*

- Resolved booking issues across phone, email, and chat, strengthening analytical troubleshooting, prioritisation, and communication in an international environment.

EDUCATION & TRAINING

Systems Analysis and Development | In progress | Expected completion: May 2027

Tokio School Portugal - Programming Training | May 2024 - May 2025

- Back-End Development: Spring Framework and Java Programming; coursework covering OCP topics.
- Object-Oriented Programming.
- Front-End Development: HTML5, CSS3, and JavaScript.
